

JEYABOOPATHI S

Mechanical Engineer | SPM Design Engineer | Industrial Automation Engineer

Mobile: 6374355940 | Email: jeyaboopathisethuraj@gmail.com | LinkedIn: [Jeya](#) | Location: Hosur, Tamil Nadu

PROFESSIONAL SUMMARY

Mechanical Engineer with over 2 years of progressive experience, advancing from Protosem Intern to Graduate Engineer Trainee and now Engineer at Forge Innovations & Ventures. Experienced in industrial robotics, Special Purpose Machines (SPMs), pneumatic automation, CAD design, rapid prototyping, and mechanical system development for manufacturing industries. Skilled in Fusion 360, SolidWorks, Ansys, Siemens TIA Portal, and industrial automation technologies, with a proven record of delivering client-focused engineering solutions.

EXPERIENCE

Engineer | Forge Innovations & Ventures, Hosur *Jul 2025 – Present*

- Assisted in the design and development of industrial automation systems, robotic workstations, and Special Purpose Machines (SPMs).
- Engineered pneumatic automation solutions using Festo and Janatics components, improving process reliability for manufacturing workflows.
- Built and tested functional prototypes end-to-end, converting concept designs into working engineering models validated for industrial use.
- Gained hands-on programming and integration experience with Yaskawa 6-DOF industrial robots.
- Delivered real-time industrial automation projects for clients including Wakefit, Luminous, and Ashok Leyland.
- Mentored students and Smart India Hackathon teams on Mechanical Design industrial automation and robotics, providing technical guidance.
- Performed mechanical design, DFM/DFA analysis, and fabrication using digital manufacturing tools and CAD platforms.

Graduate Engineer Trainee (GET) | Forge Innovations & Ventures, Hosur *Aug 2024 – Jun 2025*

- Designed and developed SCARA and articulated robotic systems for industrial automation applications, translating client requirements into functional mechanical designs.
- Created detailed 3D CAD models, manufacturing drawings, and assemblies using Fusion 360 and SolidWorks.
- Supported prototype fabrication, assembly, testing, and validation for industrial automation projects.
- Worked with Festo and Janatics pneumatic components for automation system development.
- Performed Design for Manufacturing (DFM) and Design for Assembly (DFA) analysis to improve manufacturability and reduce production time.
- Collaborated with multidisciplinary engineering teams to deliver customized automation solutions for industrial clients.

Protosem Intern | Forge Innovation & Ventures, Coimbatore *Jan 2024 – May 2024*

- Completed the final-semester Protosem internship focused on industrial automation and product development.
- Assisted in the mechanical design and development of robotic and automation prototypes.
- Prepared 3D CAD models, technical drawings, and engineering documentation for prototype development.
- Learned industrial product development methodologies, rapid prototyping techniques, and engineering design practices.

Expertise

- Designed and developed multiple Special Purpose Machines (SPMs) and custom automation prototypes to solve real-world industrial production challenges.

EDUCATION

B.E., Mechanical Engineering | Government College of Engineering, Dharmapuri *2020 – 2024*

CGPA: 7.9 / 10

TECHNICAL SKILLS

- CAD Design, Modeling & Simulation: Fusion 360, SolidWorks, Ansys
- Manufacturing: Design for Additive Manufacturing (DFAM), Design for Manufacturing (DFM)
- Industrial Robotics & Automation: SCARA, articulated & 6-DOF robots, pneumatic systems (Festo, Janatics)
- PLC Programming: Siemens TIA Portal
- Core Engineering: Rapid Prototyping, Mechanical Design, Fabrication

CERTIFICATIONS & TRAINING

- CAD & Industrial Simulation — CAD Solutions & Training Services (Feb 2023)
- Industrial Automation 4.0 — TVS Training & Services (Aug 2023)
- TCS iON National Qualifier Test (NQT) – Cognitive — Tata Consultancy Services (Sep 2023)

LANGUAGES

Tamil (Native), English (Professional Working Proficiency)
